

Online Course on Machine Learning, Deep Learning and Neural Networks

Day 2

Conducted by

Mr. Anupam Borthakur

Prime Minister's Research Fellows (PMRF)

Centre of Excellence in Artificial Intelligence
Indian Institute Of Technology, Kharagpur

Jawaharlal Nehru Technological University,
Kakinada, Andhra Pradesh

#iitKLIV
Kharagpur Learning, Imaging and
Visualization Research Group
www.iitkliv.github.io

Agenda

1. Recap
2. Types of Machine Learning
3. Difference between Supervised and Unsupervised Learning
4. Difference between Classification and Regression
5. One simple algorithm for Unsupervised Learning

Applications of Machine Learning in our day to day life

Google Maps

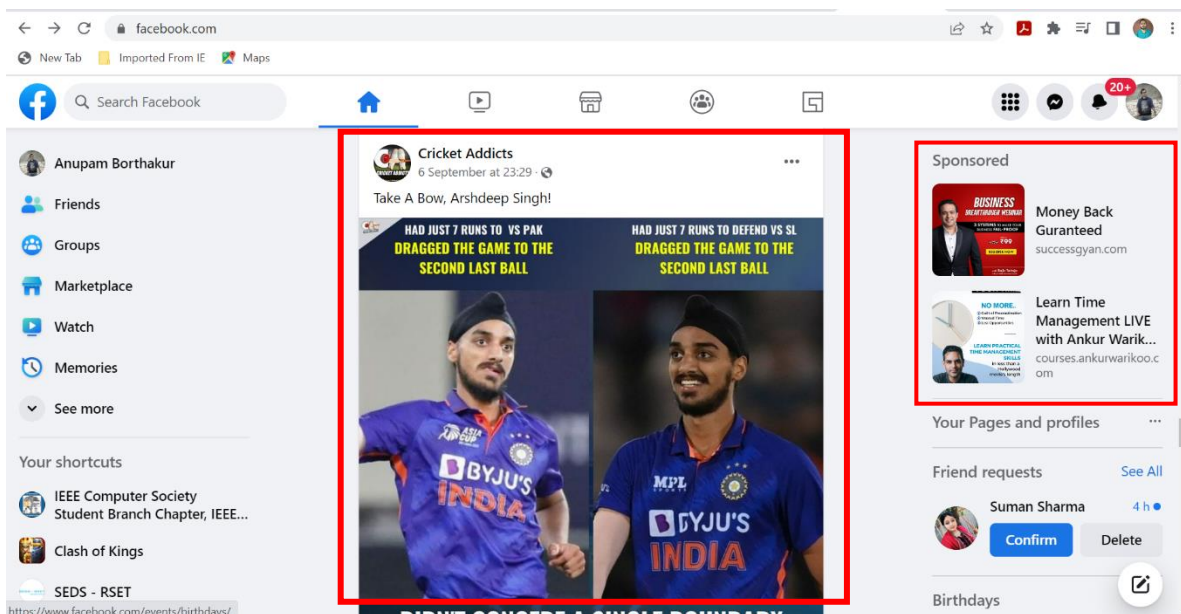

Voice Recognition

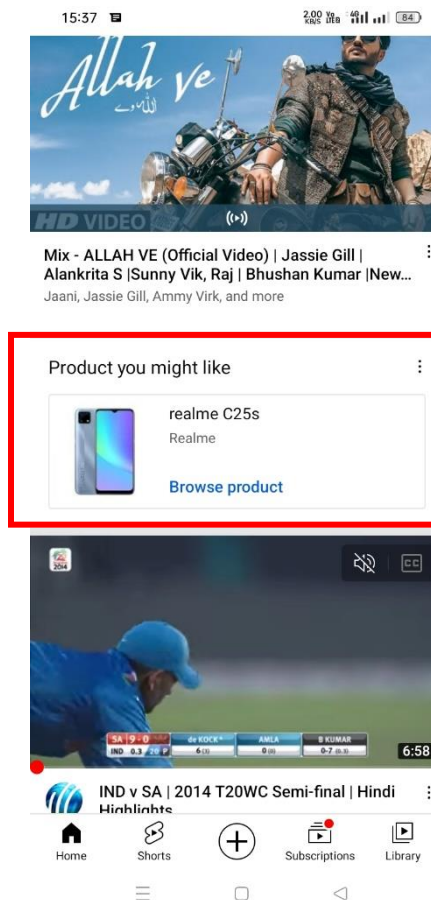

Finger Print Recognition

Importance of Data

Facebook

YouTube

Why its important to study ML now

- ✓ Abundant amount of data
- ✓ High Computational Resources
- ✓ Growing progress in the available platforms and algorithms
- ✓ Increase support from industry
 - ✓ Facebook: 10 Million Photos uploaded per hour
 - ✓ YouTube: 1 hour of video uploaded every minute
 - ✓ Google: 24 Peta bytes of data per day
 - ✓ Twitter 400 Million tweets per day

Types of Machine Learning

Supervised Learning

Un-supervised Learning

Reinforcement Learning

Importance of Data & Privacy

Growth of Data Generation

Privacy Concerns

How to bridge this gap? Data vs privacy --- Open research problem

Supervised vs Unsupervised Learning

Supervised

Age	Class
14	T
24	A
17	T
30	A

Teenager (T)
Adult (A)

Unsupervised

Age
14
24
17
30

Find patterns

New: 15

Supervised

	Age	Class
★	14	T
●	24	A
★	17	T
●	30	A

Teenager (T)
Adult (A)

Unsupervised

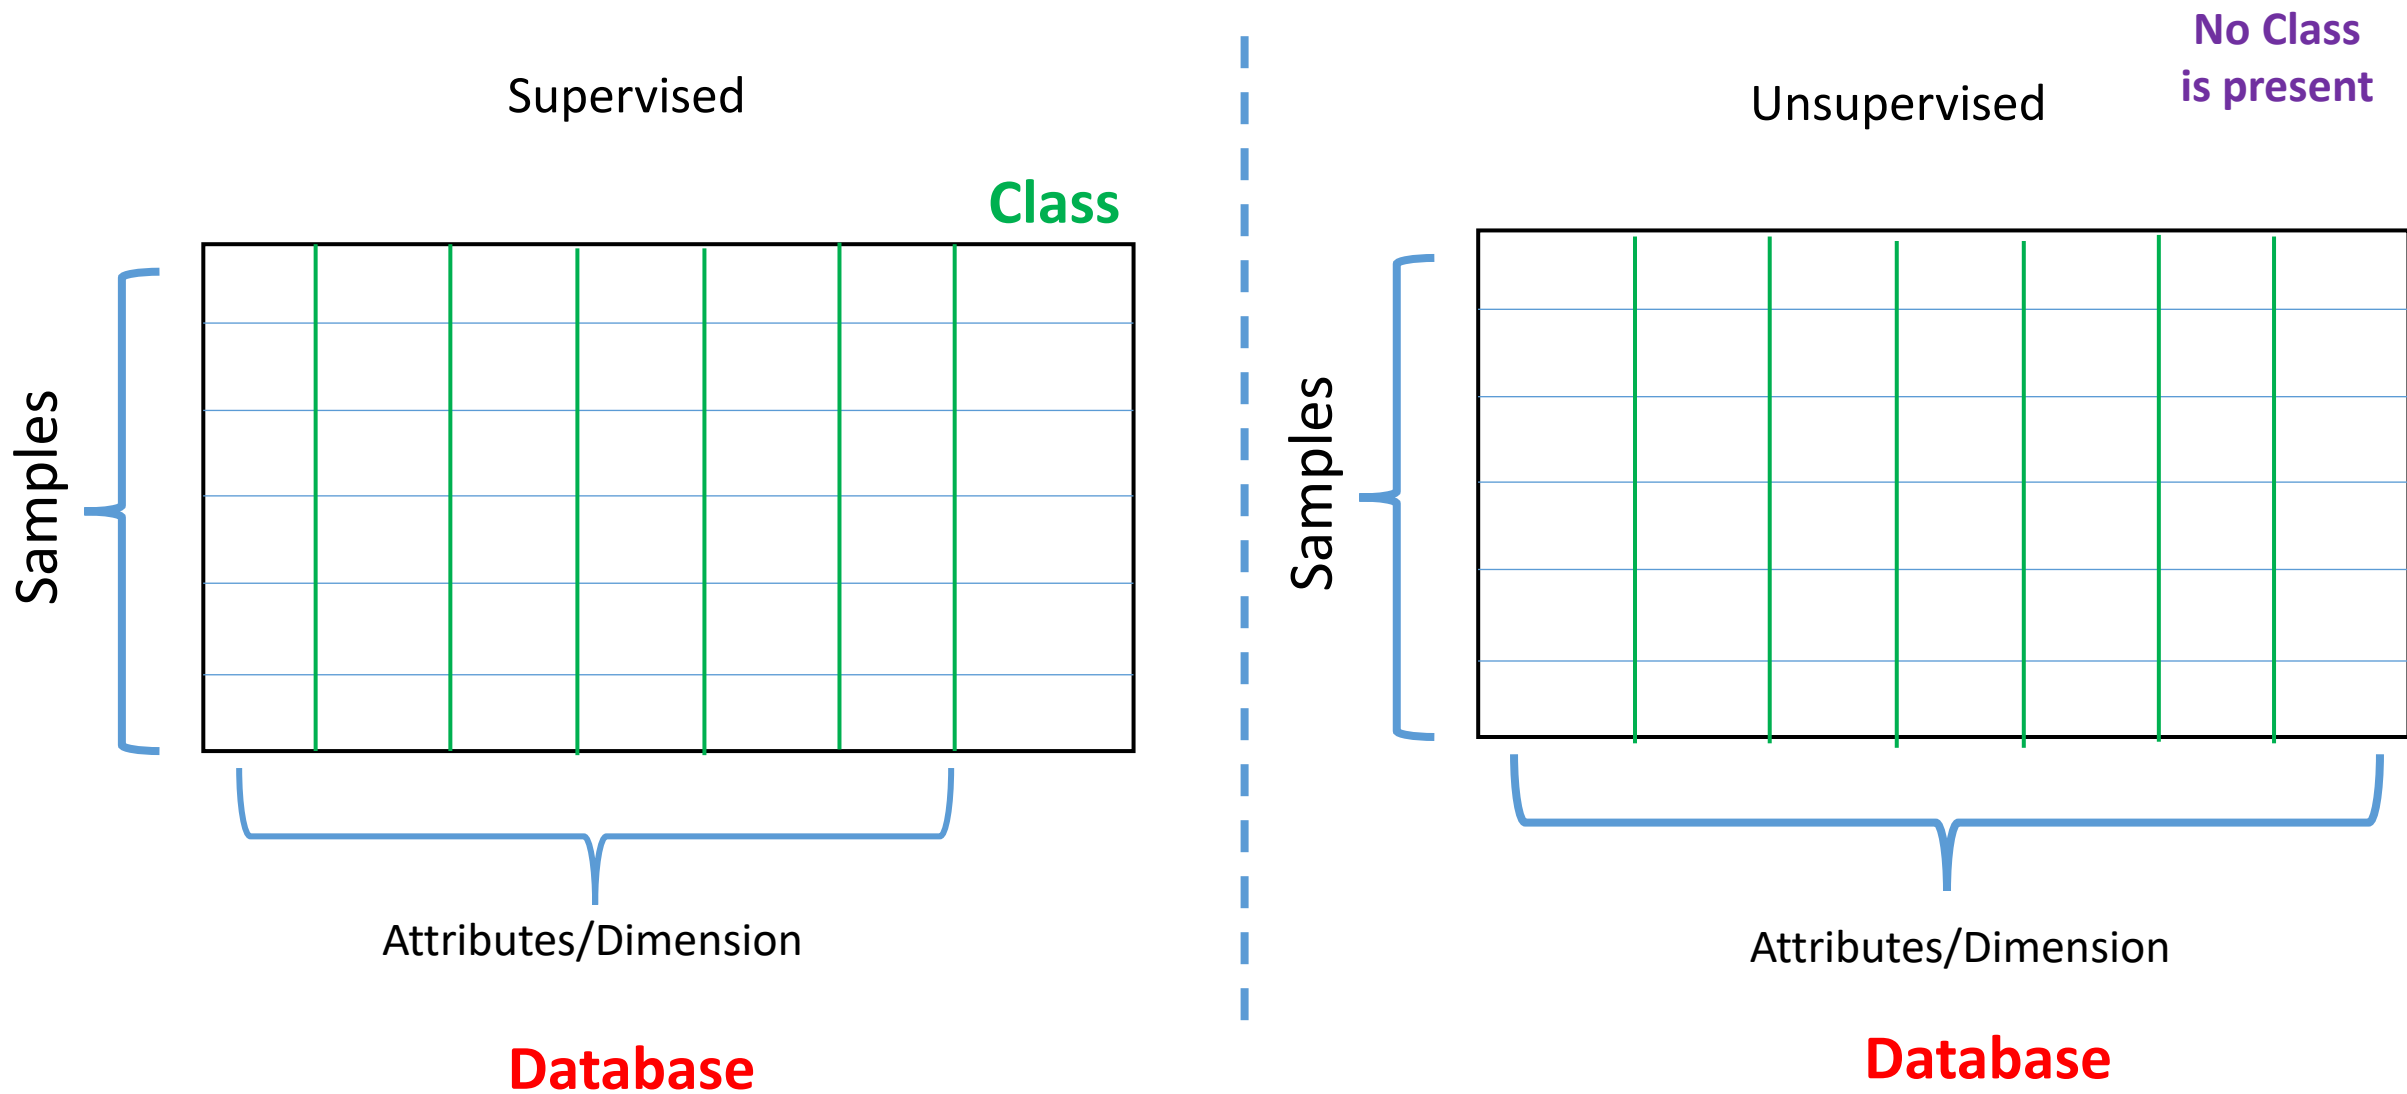

Age
14
24
17
30

Find patterns

- Groups
- Clusters

Simple Structure of a Database

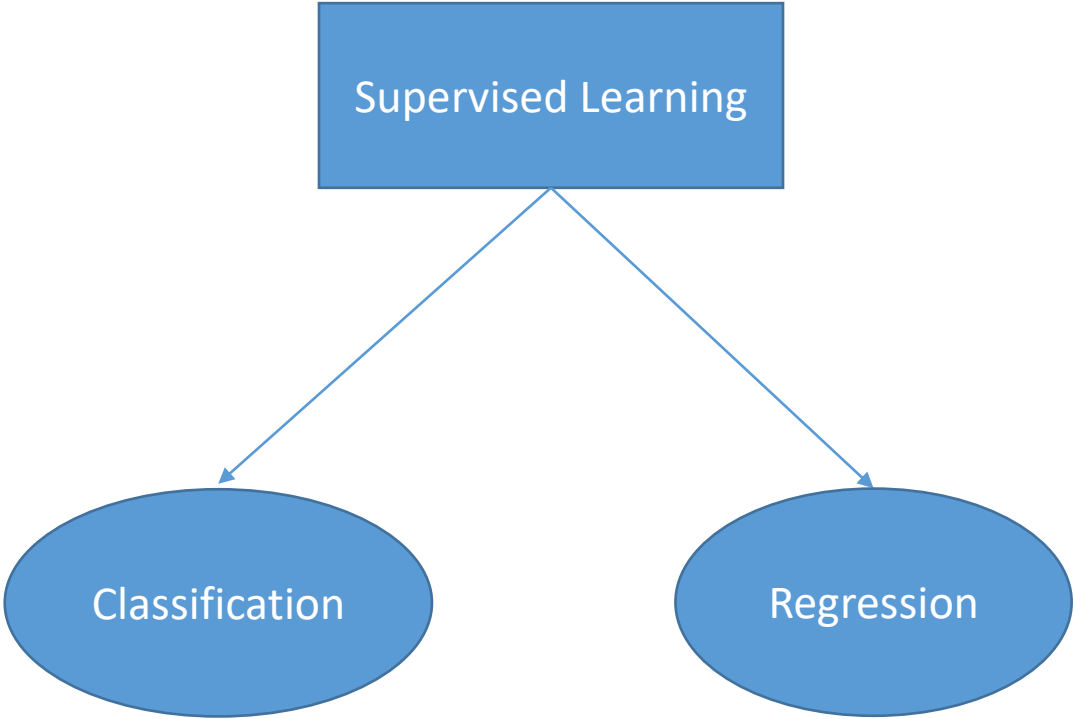

Supervised

	Age	Class
★	14	T
●	24	A
★	17	T
●	30	A

Types of Supervised Learning

Types of Supervised Learning

Age	Class
14	T
24	A
17	T
30	A

Floor	Bedroom	Years	Price
2	3	15	40 lakh
1	2	7	24 lakh
3	3	12	60 lakh
2	2	8	30 lakh
1	1	10	15 lakh

Price of a house?

Classification vs Regression

Who will win?

Classification

Regression

Predict weather for next 1 week?

Predict the stock price?

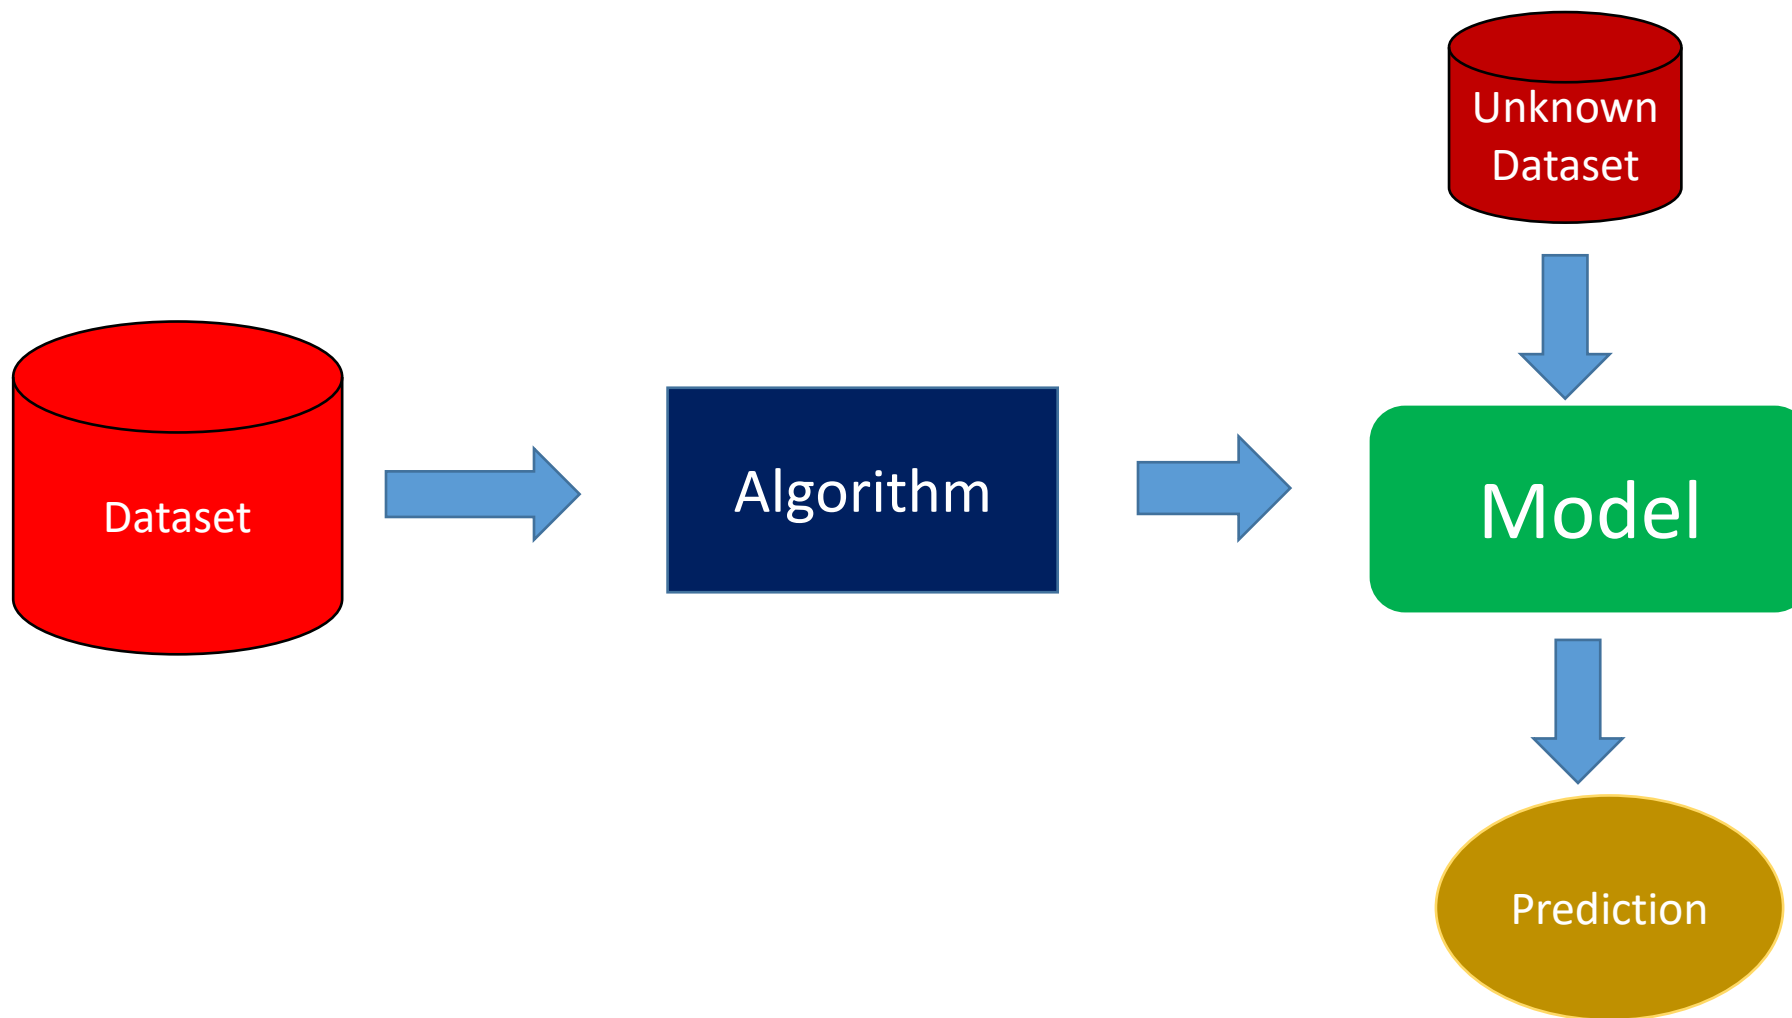

Regression

Classification

Will Modi win in 2024 election?

Simple Training Pipeline of Machine Learning

Unsupervised Learning

Input/Database

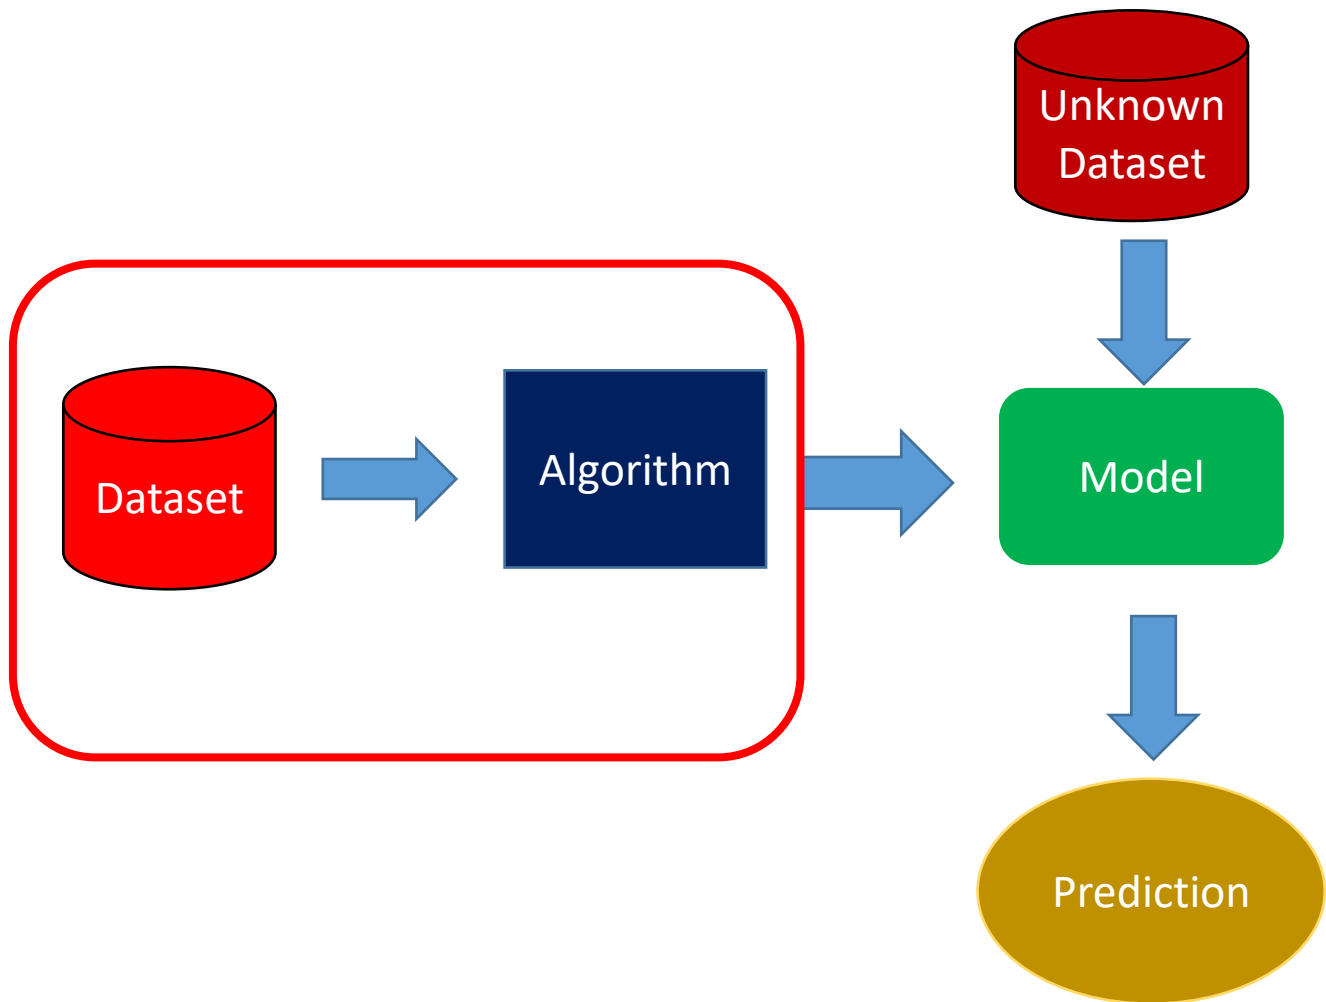

Age
14
24
17
30

Find patterns

Output/Model

Simple Training Pipeline of Machine Learning

Unsupervised Learning

Data

Age
14
24
17
30

Find patterns

Model

Data

Age
14
24
17
30

- Step 1: Choose a centroid (random)
- Step 2: Find the distance for each of the points to that centroid
- Step 3: Assign each point to the closet centroid

Data

Age	
14	← Centroid
24	
17	
30	← Centroid

Step 1: Choose a centroid (random)

Centroid

14 30

24 → $|24 - 14| = 10$
 $|24 - 30| = 6$

17 → $|17 - 14| = 3$
 $|17 - 30| = 13$

Algorithm

Step 2: Find the distance for each of the points to that centroid

Step 3: Assign each point to the closet centroid

Identify which one is **Supervised** and which one is **Unsupervised**

?

?

Thank You

For your Attention!
